About me

Automation-focused SDET with 2+ years of experience building and maintaining UI and API automation for enterprise networking products. Strong in Python, REST and gRPC testing, CI pipelines, and build validation. Proven track record of improving test coverage, reducing regression time, and catching critical production issues early. Comfortable working in fast-moving Agile teams and owning quality end to end.

Technical Skills

Programming Languages: Python

Test Automation: Selenium WebDriver, API Automation (REST), Postman, pyATS

DevOps & CI/CD: Jenkins, Git, GitHub

Test Practices: Test Case Design, Defect Tracking, Root Cause Analysis

Tools & IDEs: Visual Studio Code, Jupyter Notebook

OS & Environments: Linux, Windows, macOS

Concepts: OOP, Agile Testing, Test Framework Design

Experience

Senior Quality Engineer

Nov 2024 – Present

Persistent Systems (Client: Cisco)

Bangalore, Karnataka

- Implemented automated API and GUI test cases to verify data streaming into a gRPC server and validate server-side behavior.
- Built automated GUI and API tests for the Configuration Backup and Restore feature.
- Created automated GUI tests for key features including Configuration Templates and Kafka integration.
- Executed daily CI-driven regression on new builds, performed failure analysis, and validated fixes with developers.
- Reported 60+ defects, including multiple critical issues, improving product stability and release quality.
- Developed 300+ automation scripts from scratch, cutting manual regression time by 30% and boosting test coverage by 40%.

Software Engineer Trainee

Nov 2023 – Nov 2024

Cisco

Bangalore, Karnataka

- Contributed to testing of core features including Performance Monitoring, Fault Management, Grouping, and Inventory.
- Identified, documented, and tracked defects to support high-quality releases.
- Built 150+ automation scripts to speed up testing and reduce manual effort.
- Set up and maintained the CeVM regression environment for consistent test execution and validation.
- Managed golden configuration backups to protect baselines and enable quick recovery.
- Upgraded device build images to improve performance and stability across deployments.

Certifications & Trainings

CCNA

Cisco

Automation Testing

Simplilearn

GenAI Foundation

Persistent University

Python Competency Level - 2

Persistent University

Network and Web Automation in Python

Cisco

Education

**Bachelor of Technology
Information Technology**

Aug 2019 – May 2023
BIT, Sindri

- GPA: 8.06/10
