About me

Automation Engineer with 2+ years of experience in UI and API automation, build validation, and test environment management. Skilled in Python and DevOps workflows, focused on improving quality, reliability, and delivery speed within engineering teams.

Education

Bachelor of Technology Information Technology

Aug 2019 – May 2023

BIT, Sindri

- GPA: 8.06/10

Experience

Senior Quality Engineer

Nov 2024 – Present

Persistent Systems – (Client – Cisco)

Bangalore, Karnataka

- Implemented automated API and GUI test cases to verify data streaming into a gRPC server and validate server-side behavior.
- Built automated GUI and API tests for the Configuration Backup and Restore feature.
- Created automated GUI tests for key features including Configuration Templates and Kafka integration.
- Ran regression tests on daily builds, analyzed failures, and logged defects for quick turnaround.
- Reported 60+ defects, including multiple critical issues, improving product stability and release quality.
- Developed 300+ automation scripts from scratch, cutting manual regression time by 30% and boosting test coverage by 40%.

Software Engineer Trainee

Nov 2023 – Nov 2024

Cisco

Bangalore, Karnataka

- Contributed to testing of core features including Performance Monitoring, Fault Management, Grouping, and Inventory.
- Identified, documented, and tracked defects to support high-quality releases.
- Built 150+ automation scripts to speed up testing and reduce manual effort.
- Maintained strong test coverage through well-structured and reusable automation.
- Set up and maintained the CelVM regression environment for consistent test execution and validation.
- Managed golden configuration backups to protect baselines and enable quick recovery. Upgraded device build images to improve performance and stability across deployments.
- Upgraded device build images to improve performance and stability across deployments.

Projects

Ride With Me - Cab Service

[Project Link](#)

- Designed and implemented a responsive cab booking website to facilitate seamless and reliable ride scheduling for users.
- Built frontend using **PHP**, **HTML**, **CSS**, **JavaScript**, and styled with **Tailwind CSS** and **Bootstrap** for modern UI.
- Integrated backend with MySQL to manage user data, booking history, and cab availability.

Skyline Weather App

[Project Link](#)

- Developed a real-time weather web app that fetches live data using the **OpenWeatherMap** API.
- Built with **React.js** and styled using **CSS** for a responsive and visually appealing user interface.

Technical Skills

Programming Languages: Python

Tools & Frameworks: Selenium, Postman, REST API, Jupyter Notebook, pyATS

DevOps & CI/CD: Jenkins, Git, GitHub

IDEs & Code Editors: Visual Studio Code

Operating Systems & Environment: Linux, Windows, MacOS

AI & Productivity Tools: ChatGPT, Github Copilot, Google Gemini

Other Skills: Object-Oriented Programming (OOP)

Trainings

CCNA	Cisco
Automation Testing and Planning	Simplilearn
Network and Web Automation in python	Cisco
Python Developer	Persistent University

Certifications

CCNA	Cisco
Python	Simplilearn
Automation Testing	Simplilearn
GenAI Foundation	Persistent University
Python Competency Level - 2	Persistent University
