About me

Automation Engineer with 1.5+ years of experience, specializing in UI automation, build validation, and test environments. Strong in Python and DevOps practices, seeking to contribute to fast-paced, quality-focused engineering teams.

Education

Bachelor of Technology
Information Technology Aug 2019 – May 2023
BIT, Sindri

- GPA: 8.06/10

Experience

Senior Quality Engineer Nov 2024 – Present
Persistent Systems – (Client – Cisco) Bangalore, Karnataka

- Automated GUI test cases for features such as Configuration Template and Configuration Backup & Restore.
- Performed regression testing on daily builds; analyzed test failures and documented defects for prompt resolution.
- Identified and logged over 40 defects, including several critical bugs, leading to a more stable product and higher quality releases.
- Developed over 200 automation scripts from scratch to streamline testing processes and improve efficiency, which reduced manual regression testing time by 40% and increased test coverage by 60%.
- Managed and validated diverse server configurations including DualStack (IPv4/IPv6), GeoHA (Geographically distributed High Availability), and Backup & Restore environments, ensuring system resilience, failover readiness, and data recovery integrity across multiple deployment scenarios.

Software Engineer Trainee Nov 2023 – Nov 2024
Cisco Bangalore, Karnataka

- Worked on features like Performance Monitoring, Faults, Grouping, Inventory.
- Identified and documented relevant defects to ensure high-quality releases.
- Developed more than 150 automation scripts to streamline testing processes and improve efficiency.
- Ensured comprehensive test coverage through robust scripting practices.
- Setup and maintained the CelVM regression environment to ensure consistent testing and validation.
- Managed backups of golden configurations to safeguard baseline settings and enable easy restoration.
- Upgraded device build images, contributing to improved performance and stability across deployments.

Projects

Ride With Me - Cab Service [Project Link](#)

- Designed and implemented a responsive cab booking website to facilitate seamless and reliable ride scheduling for users.
- Built frontend using **PHP**, **HTML**, **CSS**, **JavaScript**, and styled with **Tailwind CSS** and **Bootstrap** for modern UI.
- Integrated backend with MySQL to manage user data, booking history, and cab availability.

Skyline Weather App [Project Link](#)

- Developed a real-time weather web app that fetches live data using the **OpenWeatherMap** API.
- Built with **React.js** and styled using **CSS** for a responsive and visually appealing user interface.
- Enabled city-specific weather search functionality with real-time updates.

Technical Skills

Programming Languages: Python

Tools & Frameworks: Selenium, Postman, Jupyter Notebook, pyATS

DevOps & CI/CD: Jenkins, Git, GitHub

IDEs & Code Editors: Visual Studio Code

Operating Systems & Environment: Linux, Windows, MacOS

AI & Productivity Tools: ChatGPT, Github Copilot, Google Gemini

Other Skills: Object-Oriented Programming (OOP)

Trainings

CCNA	Cisco
Automation Testing and Planning	Simplilearn
Network and Web Automation in python	Cisco
Python Developer	Persistent University
DevOps - Developer	Persistent University

Certifications

CCNA	Cisco
Python	Simplilearn
Automation Testing	Simplilearn
GenAI Foundation	Persistent University
Python Competency Level - 2	Persistent University
